

MOTIVATIONAL LETTER

AIDAN MICALLEF

B.Sc. Maths and Statistics year II

I would like to join S-Cubed to represent Maths and Statistics as I feel that there is not enough interest and i wish to include these students more in S-Cubed activities and represent them in the organisation. I can increase student interest in S-Cubed from these courses as I consider myself outgoing and am willing to help anyone with their needs. Also i have attended a lot of S-Cubed event in the past 3 years and I feel that I could contribute something back. I vow to be committed to S-Cubed and hope to gain as much experience and organisational skills as i can. I have served previously in St. Aloysius student council and I believe I am ready to work for the benefit of other students.
