

# S-Cubed Executive Nomination

Daniel Vella

---

I believe that being an active student is one of the most important aspects of Campus. Forming part of student organization made me aware of the importance to listen to the student and make them feel included. By incorporating more and more students into the organization one acquires not only greater exposure towards other students, but also a variety of new ideas. By involving more students one can also increase the workload of the organization which will allow it to put up more events and truly target the students desires. Incorporating more students also results in greater audience in events and more feedback will be given.

During the past 2 years, I have been an active member in SDM and this experience has brought me to love student activism and representation. This year, I have been trusted to form part of an Executive sub-committee in SDM and now I would like to start forming part of S-Cubed as it works for science students like me.

If elected for the S-Cubed executive, I will work on improving on the work of previous executives such as implementing new ideas, as well as involving more students of the faculty to be active in the organization. By the end of my time in the executive, I will hopefully look back and proudly see that I formed part of a successful executive and truly made a difference.
