

## Motivational letter for S-Cubed (by John Paul Mizzi)

Hi, my name is John Paul Mizzi, a member of the faculty of science studying chemistry in our glorious university, and I would like to join S-cubed. Seeing as I am a student of chemistry, I am interested in having a say in the student society associated with it and having a say in affairs which would make the university of all science students a more pleasant experience for all while also helping to keep the students as invested in the course as possible.

S-cubed is also an organisation interested in promoting an enterprise I have a deep interest in, which is science of course. The education and spread of the process of science is something that I find is extremely important these days where science and innovation are consistently transforming all of our lives.

I hope my skills that I have acquired through being a leader in the Scout movement while also previously helping in the Science Communication sub-committee can be of use to this organisation and help it continue forward.

If  $H_2O$  is the formula for water, what is the formula for ice?  $H_2O$  Cubed.
