

Motivational Letter

I would like to join S-cubed because it reminds me why I love science – the many activities that the team produces each year not only enhance people's passion for science, but provide an outlet for it and an opportunity to make new friends too. I think that activities such as Share!t are excellent initiatives for just this. The organization works very hard to bridge the gaps between the different science disciplines, and I believe that it is succeeding in doing so.

S-cubed embodies the true values of science: new ideas that brings people together with a common passion. I am truly honoured to have the chance to be an active part of this organization, and to continue putting forward positive messages for current and future science students.
