

Being part of S-Cubed during these past two years has proven to be an amazing experience that enhanced my University life. S-Cubed enriched me in so many ways that no academic course could. I became more aware of my skills and strengths and I had the pleasure to meet other students from other courses and different backgrounds which made me a more rounded person.

With the experience attained as an S-Cubed executive member, I now have a better understanding of what S-Cubed is about and a clear idea of where should S-Cubed be in future terms. This year has encouraged me to work even harder for this organization, and strive to push it forward, which is why I believe that I should again be part of this year's executive team.
