

I was always interested in forming part of the S-Cubed executive team, and have always been an active member, having participated in all the events organised since my 1st year in my Bsc. Biology and Chemistry course. In 2011, I decided to join S-Cubed and was given the role of Vice-Activities co-ordinator, whilst in 2012 I was entrusted with the role of Public relations officer.

During these 2 years in the S-Cubed committee, I believe I have gained the necessary experience to join the S-Cubed executive once again for the third time. I have always worked and proved to be a hard-working and responsible person in order to achieve our main goal of promoting unity towards students. During these past 2 years, I have grown very fond of the organisation, and cannot imagine my life at University without S-Cubed, which is why I chose to apply once again.

Being in S-Cubed has been a great experience for me, especially on a personal level since I became more aware of my capabilities and strengths and met a lot of different people. I hope I will be able to continue giving my input in the S-Cubed team and contribute to the organisation in the future.
