

Dear Science Students' Society Executive Board,

Please accept this letter as a formal notification that I am resigning from my position as Science Communication Officer. My last day will be the 15th of July, as I need to go abroad on the 19th of July due to family commitments.

I would like to thank the past and present S-Cubed's Executive Board for entrusting me with this position, and giving me the opportunity to do what I enjoy the most; spreading my knowledge of and love for science. Even though my official term started on the 1st of July, my science communication endeavour started in early May, at Eureka. Eureka at the President's Secret Garden, a collaboration between Science Students' Society and The President's Foundation for the Wellbeing of Society, was a weekly event set up to demonstrate science experiments to primary school children in a fun, interactive way, and to deliver a clear scientific explanation of every experiment. Even though the event was entertaining and educational for the children, I enjoyed myself and learned as much as they did. It was a lesson delivered to both parties; they learned science and in the meantime, they thought me how to teach science; a "skill", which even though needs improvement, is a good acquisition. And for this learning experience, which I will take with me throughout the rest of my life, I owe a big thank you to the past and present S-Cubed's Executive Board. My learning experience would not have been possible if this project was not set up, and this project materialised because of your constant hard work and dedication, commitment and perseverance.

Lastly, even though I am confident that you will do an excellent job, I would like to wish you the best of luck for this term. I hope to have the opportunity to stay in touch in the future.

Sincerely,

Tatiana Evgeniyevna Mogileva
